Education

Indian Institute of Technology (IIT), Roorkee Roorkee, Uttarakhand B.Tech in Mechanical Engineering	Nov 2021 - May 2025 Score: 8.51/10
Red Rose Education Centre Farrukhabad, Uttar Pradesh Class 12, Central Board of Secondary Education (CBSE)	Apr 2020 - Apr 2021 Score: 93.6%
Dr. VSEC Farrukhabad, Uttar Pradesh Class 10, Central Board of Secondary Education (CBSE)	Apr 2018 - Apr 2019 Score: 98.6%

Work Experience

Associate Consultant Kalliope Consulting <i>Consulted India's largest political alliance (NDA) in the 2025 Bihar Assembly election; contributed to a decisive victory of 202/243 seats statewide</i> - Drove political strategies in 6 assembly constituencies of Begusarai using voter analytics, stakeholder interviews, & booth-level insights - Developed political campaign strategies through data-driven voter behaviour analysis, improving client campaign success rate by 20% - Conducted primary research with leaders, journalists, and voters to shape governance priorities and hyperlocal campaign messaging - Developed an automated live dashboard using web scraping on Mlalads with data automatically updated every 2 days via GitHub Actions	July 2025 - Present
Management Trainee Intern TATA Steel <i>Collaborated with TATA Steel's technical team to pilot and scale predictive maintenance across blast furnace variants for plant-wide adoption</i> - Developed a sensor-driven predictive maintenance system for screens, successfully reducing unscheduled shutdown costs by \$40 lakh - Leveraged vibration analysis integrated with IoT sensors and various ML models to enable proactive early machine failure detection - Enhanced equipment reliability and minimized maintenance downtime by 10hrs via real time quantitative data driven predictive monitoring	May 2024 - July 2024
Data Analyst Intern Psyliq <i>Worked as data analyst at the Psyliq as an remote intern focusing on extracting data from diabetes datasets and analyzing employee performance</i> - Queried and transformed diabetes datasets using SQL, analysing 5 key features to support advanced exploratory and statistical analysis - Analysed employee engagement data using Excel and Power BI, delivering actionable insights that improved workforce retention by 30% - Utilized various Python modules, including PyPDF3, BeautifulSoup, and Pandas, to automate data extraction from various files	Dec 2023 - Jan 2024

Projects

Cross Border Remittance Business Strategy Model - Devised a blockchain-based unified global payment protocol for cross-border remittances, reducing operational costs by \$75K annually - Addressed India's \$120 billion inward remittance gap by designing an optimized end-to-end remittance framework for seamless transfers - Enhanced transactional efficiency by 20% through strategic minimizing foreign exchange fees and streamlining overall service quality	Feb 2024 - Mar 2024
Optimizing India's Trucking Industry and Supply Chain Management - Reduced transportation costs 15% by Genetic Algorithms and Simulated Annealing optimization to solve complex routing inefficiencies - Improved delivery times 20% through algorithm-driven route planning and load optimization, streamlining logistics across the industry - Decreased downtime by 25% and boosted fleet efficiency by 30% by integrating IoT and GPS monitoring for real-time diagnostics	Feb 2024 - Mar 2024
Data Analysis to Improve Customer Engagement & Boost Profitability - Performed customer segmentation using clustering algorithms, driving a significant 25% boost in tailored customer engagement - Developed predictive models for Customer Lifetime Value, contributing to 15% increase in ROI and optimizing targeted marketing spend	Feb 2024 - Mar 2024
Traffic Sign Recognition - Developed a robust CNN and YOLO-based model for traffic sign detection on GTSRB dataset, achieving an 86% test accuracy - Implemented ReLU activation with 10+ max-pooling layers to enhance deep feature extraction and improve overall model stability - Optimized model training efficiency by 15% using categorical cross-entropy loss and Adam optimizer for faster and efficient convergence	Apr 2023 - May 2023

Positions of Responsibility

Co - Convener Sangram 2024 Sports Fest, IIT Roorkee <i>Led a 4-tier team of over 150 members and managed diverse functions of finance, technology, logistics, sponsorship, publicity, and marketing</i> - Revived Sangram Annual Sports Fest after a 5-year hiatus, leading a cross-functional team of 150+ members to execute the event - Secured INR 1.5M+ in sponsorships from leading companies, including Yoga Bar, Yonex, Beardo, Unibic, and Shiv-Naresh Group - Publicized the fest strategically across 12 states and over 70 colleges, driving a 150% year-over-year increase in number of participants	Jan 2024 - Apr 2024
Thomso Organizing Committee Thomso 2023 Cultural Fest, IIT Roorkee <i>Led a team of over 15 members and managed diverse functions of logistics, sponsorship, publicity, and marketing to organize the youth fest</i> - Spearheaded sponsorship acquisition, securing INR 80 lakh to organize and launch the North India's largest annual youth cultural fest - Directed end-to-end logistics and operations for a large-scale event hosting 40K+ attendees from Inter-IITs and top institutions of India	Jun 2023 - Apr 2024

Skills & Expertise

Languages & Softwares: Python C++ SQL MS Excel/Word/Power Point Scikit Learn Tensorflow PowerBI Jupyter Lab ML/DL
Coursework: Economics Industrial Management Probability and Statistics Mathematics I & II Supply Chain Management
Certification: Machine Learning by Andrew Ng Fundamental Python Programming SQL
